

TAMAN NEGARA

Taman Negara (National Park) straddles the borders of Kelantan, Terengganu and Pahang in Peninsular Malaysia. A totally protected area of 4,343 sq km, Taman Negara is one of the world's oldest tropical rain forests. The diversity of its fauna and flora is a result of undisturbed evolution over 130 million years. It is located 4 and 5 north of the equator. It lies within the headwaters of three river system; the Tembeling in the south, the Trenggan in the east and the Relai-Aring-Labir in the north and received rain throughout the year. Taman Negara is a particularly favorable destination for trekking. Let your spirit of adventure take you to new heights: the canopy, which is the top layer of vegetation in a forest. All you have to do is venture onto the Park's canopy walkway, installed at elevations above 25 metres and stretching over 400 metres - the world's longest. Truly a highlight not to be missed. Deeper in the heart of Taman Negara lies Trenggan Lodge, at Kuala Trenggan. A quiet retreat enveloped by nothing but the green high rises of nature.
